Volume 244 November 1992

CONTENTS

Effect of nonlinear polarization on shapes and stability of pendant and sessile drops in an electric (magnetic) field. Osman A. Basaran and Fred K. Wohlhuter *page* 1

Polymer stretch in dilute fixed beds of fibres or spheres. Eric S. G. Shaqfeh and Donald L. Koch 17

Propagation of nonlinear acoustic waves in a tunnel with an array of Helmholtz resonators. N. Sugimoto 55

Three-dimensional nonlinear blow-up from a nearly planar initial disturbance, in boundary-layer transition: theory and experimental comparisons. P. A. Stewart and F. T. Smith 79

Numerical simulation of low-Reynolds-number turbulent flow through a straight square duct. S. Gavrilakis 101

On similarity solutions occurring in the theory of interactive laminar boundary layers. Philipp Gittler 131

Nonlinear waves on the surface of a falling liquid film. Part 2. Bifurcations of the first-family waves and other types of nonlinear waves. O. Yu. Tsvelodub and Yu. Ya. Trifonov 149

Propagation of weakly nonlinear waves in stratified media having mixed nonlinearity. A. Kluwick and E. A. Cox 171

On the shape of a two-dimensional bubble in uniform motion. P. N. Shankar 187

Liquid-metal flows near a magnetic neutral point. R. G. Kenny 201

Shock-induced collapse of single cavities in liquids. N. K. Bourne and J. E. Field 225

The characteristics of laminar flow in a helical circular pipe. Wen-Hwa Chen and Ray Jan 241

Weakly nonlinear theory of regular meanders. G. Seminara and M. Tubino 257

Non-parallel effects in the instability of Long's vortex. M. R. Foster and David Jacqmin 289

The squeezing of red blood cells through parallel-sided channels with near-minimal widths. D. Halpern and T. W. Secomb 307

A systematic derivation of the leading-order equations for extensional flows in slender geometries. J. N. Dewynne, J. R. Ockendon and P. Wilmott 323

An experimental and numerical study of the Dean problem: flow development towards two-dimensional multiple solutions. B. Bara, K. Nandakumar and J. H. Masliyah 339

Unsteady transonic flow past a quarter-plane. N. Peake 377

Numerical simulations of Lewis number effects in turbulent premixed flames. D. C. Haworth and T. J. Poinsot 405

Blunt-body impact on a compressible liquid surface. Alexander Korobkin 437

Nonlinear water waves at a submerged obstacle or bottom topography. John Grue 455

A Monte Carlo solution for rapidly shearing granular flows based on the kinetic theory of dense gases. Mark A. Hopkins and Hayley H. Shen 477

A study of singularity formation in vortex-sheet motion by a spectrally accurate vortex method. M. J. Shelley 493

Reynolds analogy for a shearing granular material. David G. Wang and Charles S. Campbell 527

Exponential tails and skewness of density-gradient probability density functions in stably stratified interactions. S. T. Thoroddsen and C. W. Van Atta 547

Non-localized receptivity of boundary layers. J. D. Crouch 567

Nonlinear three-wave interaction with non-conservative coupling. David W. Hughes and Michael R. E. Proctor 583

Stability of rotating shear flows in shallow water. Charles Knessl and Joseph B. Keller 605

Fluid-elastic instabilities of liquid-lined flexible tubes. D. Halpern and J. B. Grotberg 615

On solutions relating to conical vortices over a plane wall. C. Sozou 633

On Rayleigh's investigation of crispations of fluid resting on a vibrating support. John Miles 645

Properties of strongly nonlinear vortex/Tollmien–Schlichting-wave interactions. A. G. Walton and F. T. Smith 649

Direct simulation of the stably stratified turbulent Ekman layer. G. N. Coleman, J. H. Ferziger and P. R Spalart 677

Approximate second-order two-point velocity relations for turbulent dispersion. Alan J. Faller 713

Reviews

Solitons, Nonlinear Evolution Equations and Inverse Scattering, by M. J. Ablowitz and P. A. Clarkson 721

Fluid Mechanics, by P. K. Kundu; Viscous Flow, by F. S. Sherman 722
